Object : Application for Applied Research Scientist Intern at **ElementAI** (Montréal, Toronto)

Dear Mrs, Mr,

I am currently taking courses for my senior year of Engineering School at *Ecole Internationale des Sciences du Traitement de l'Information* (EISTI), Cergy-Préfecture, FRANCE and I chose Artificial Intelligence as my major. I met **Jean-Philippe LAFORTUNE**, *User Experience Designer* at **ElementAI Montréal** (jp@elementai.com) and he advised me to apply for this internship for 2019.

Within the framework of my scholarship, I wish to do an end-of-studies internship (6 months) in Artificial Intelligence starting in April 2019.

Having an open mind and being a man of conviction led me to Toronto, ON, CANADA for a volunteering experience in a community-based association and later to Singapore for a student exchange. I also went to Montréal, QC, CANADA to visit my sister and discover the province of Québec. I deepened my knowledge about Management as I took courses at *Grenoble Ecole de Management* (GEM) for a double diploma. I am rigorous in my work and respect very much punctuality. I have an advanced level in English (TOEIC : 935) that I try to improve by watching English series without subtitles and also speak Chinese thanks to my mother. During the summer 2018, I became an entrepreneur to create a language learning tool app and I was in charge of the marketing, the communication, the graphic design and the IT development. For my courses, I mostly code in Python; therefore, I learned to operate many Python libraries such as OpenCV, Scikit-learn, Tensorflow and Keras. I think Deep Learning and Computer Vision are my most preferred topics to work on. I look forward to apply my knowledge on Machine Learning on real datasets. Working for **ElementAI** would be for me an excellent learning experience to strengthen my future prospects and learn about a new culture; and for you to profit from the perspective of an aspiring-to-become computer science engineer.

I would appreciate hearing from you; I can be reached at romanetvin@eisti.eu to provide any additional information you might require. Enclosed you will find my résumé. Thank you for your consideration.

Yours sincerely,

Vincent ROMANET
